| Claim 1   |   |
| 1. A method for assisting a user in identifying a subfamily of items within a family of items said method performed with a server connected to a client computer through a computer network, comprising the steps of: | <p>1-800-Flowers performs a method for assisting a user in identifying a subfamily of items within a family of items, the method performed with a server connected to a client computer through a computer network.</p> <p>In particular, for example, 1-800-Flowers servers that are connected to clients over the Internet at 1800flowers.com perform the method. In the example screenshots below, the method is used for assisting users in identifying subfamilies of items within families of items, including flowers, plants, and gift baskets, among others.</p>  |
| (a) providing a computer readable data file of stored information representing at least one family of items, said data file identifying at least one alternative for each item,                                       | <p>1-800-Flowers provides via 1800flowers.com a computer readable data file of stored information representing at least one family of items, the data file identifying at least one alternative for each item.</p> <p>As can be seen in the illustrative screenshots, one of the many families of items is Baskets. See 1800flowers.com/search.do?keyword=baskets&amp;x=0&amp;y=0, reachable from 1800flowers.com by searching for "baskets".</p>   |
| (b) reading said data file,   | <p>1-800-Flowers reads the data file.</p> <p>For example, it does so in the process of serving the page listing Baskets at 1800flowers.com/search.do?keyword=baskets&amp;x=0&amp;y=0.</p>   |
